

Favorable & Unfavorable Deposit Adjustment Processing

When an agency records a CR Document Type and the total amount recorded on the CR is not equal to the amount later verified at the bank, the Treasurer's Office will then process a State Treasurer – Treasury Adjustment (STADJ) document that will either increase (favorable) or reduce (unfavorable) the agency's cash to match the bank total. This is similar to the process in legacy AFIS. Here is the entry on the posting line of the document:

Favorable Deposit Adjustment:

Debit: Cash (Balance Sheet Account 0070)

Credit: Favorable Deposit Discrepancy Payable (Balance Sheet Account 1530)

Unfavorable Deposit Adjustment:

Debit: Unfavorable Deposit Discrepancy Rec (Balance Sheet Account 0553)

Credit: Cash (Balance Sheet Account 0070)

Once the agency has researched the reason for the difference and identified what chart of account elements this difference relates to, the agency can process a Department Adjustment – Treasury Adjustment (DADJ) document to adjust revenues or expenditures as appropriate. The DADJ document must be processed to reference the original fund adjusted by the Treasurer's Office in order to properly close out the balance sheet effect of their transaction. However, if the revenue or expenditure adjustment relates to another fund, then an Internal Exchange Transaction (IET) document must be processed to transfer the effect of the adjustment to the other fund(s).

Procedure

The following event types are available to use on the CR Document Type for a Favorable or Unfavorable deposit adjustment:

Favorable Deposit Adjustment:

- ARD2 (Favorable Deposit Adjustment) – replaces legacy AFIS TC 141
- ARDB (Favorable Deposit Adjustment– Expenditure) – replaces legacy AFIS TC 151

Unfavorable Deposit Adjustment:

- ARD1 (Unfavorable Deposit Adjustment) – replaces legacy AFIS TC 142
- ARDA (Unfavorable Deposit Adjustment– Expenditure) – replaces legacy AFIS TC 143

- Change the **line amount** and any chart of account elements that should be different, on the fund accounting and detail accounting tabs (e.g. Program Period Code, etc.)
- Ensure that the amounts on all accounting lines of the DADJ document do not add up to more than the total amount on the referenced STADJ document. Also, ensure that the fund is the same fund as was recorded on the STADJ, for each of the accounting lines.

Tip: If revenues or expenditure related to this transaction must be transferred to other funds, then it may simplify things to record these activities to one chart of account “bucket” (e.g. 4699, etc.) on the DADJ document and then use the IET clear out this “bucket” and transfer these activities to the corrected funds and other chart of account elements.
